Research

- 2017 **The Economic Impact of Brexit-induced Reductions in Migration**
(with Jonathan Portes, King's College London)

Oxford Review of Economic Policy (2017) 33 (S1): S31-S44

We analyse the impact of Brexit on migration flows to the UK in both the short and long term, and provide plausible, empirically-based estimates of the impacts on growth, employment and wages.

- Macroeconomic Determinants of International Migration to the UK**
(with Jonathan Portes, King's College London)

GLO Discussion Paper n.69; IZA Discussion Paper n.10802

We examine both economic and policy determinants of long-term international migration to the UK using International Passenger Survey (IPS) data, while also providing an assessment of the reliability of IPS and suggesting ways to improve British immigration statistics.

Masters Dissertation

title *Economic Assimilation of Pre- and Post-2004 EU Enlargement UK Immigrants*
supervisor **Jonathan Portes**, *King's College London*
description A panel data analysis of the labour market performance (earnings level and employment probability) of immigrants in the years 2009-2014, using available waves from the UK Household Longitudinal Study; immigrants are in particular divided by arrival before or after the 2004 EU enlargement and by region of origin.
